

DPWH FLOOD CONTROL PROJECTS

This project contains all necessary information regarding all reported flood control projects by the Department of Public Works and Highways (DPWH). The dataset used for this project is sourced from sumbongsapangulo.ph. The data visualizations you see here were all done using PowerBI Online.

OBJECTIVES

Objective 1:

To evaluate the Department of Public Works and Highways' (DPWH) annual spending efficiency by analyzing how funds are allocated and utilized across multiple fiscal years.

KPI Requirement:

- **KPI:** Annual Budget Utilization Rate
- **Description:** Measures the ratio between total Approved Budget and Actual Contract Cost per year.
- **SMART Requirement:**
 - **Specific:** Compare the total approved funding and actual expenditures for each year (2022–2025).
 - **Measurable:** Calculate as $(\text{Contract Cost} \div \text{Approved Budget}) \times 100$.
 - **Achievable:** Based on available DPWH project records from sumbongsapangulo.ph.
 - **Relevant:** Assesses how efficiently funds are spent across years.
 - **Time-Bound:** Evaluated annually from 2022 to 2025.

DPWH FLOOD CONTROL PROJECTS

This project contains all necessary information regarding all reported flood control projects by the Department of Public Works and Highways (DPWH). The dataset used for this project is sourced from sumbongsapangulo.ph. The data visualizations you see here were all done using PowerBI Online.

OBJECTIVES

Objective 2:

To assess the scale and productivity of DPWH's flood control efforts by tracking the total number of implemented projects and corresponding funding amounts.

KPI Requirement:

- **KPI:** Total Project Count and Total Funding Cost
- **Description:** Indicates the total number of projects implemented and total value of investments across the studied period.
- **SMART Requirement:**
 - **Specific:** Count all reported flood control projects and sum their contract costs.
 - **Measurable:** Total number of projects and total funding in pesos.
 - **Achievable:** Derived from the consolidated project dataset.
 - **Relevant:** Measures the magnitude and coverage of DPWH's flood control operations.
 - **Time-Bound:** Cumulative data from July 2022 to May 2025.

OBJECTIVES

Objective 3:

To identify top-performing and underperforming contractors by ranking their total project value, project count, and completion record within the period.

KPI Requirement:

- **KPI:** Contractor Performance Index
- **Description:** Aggregates total contract value and project count per contractor to determine dominance and reliability.
- **SMART Requirement:**
 - **Specific:** Rank all contractors based on total contract cost and completed project count.
 - **Measurable:** Contract value in pesos and number of projects.
 - **Achievable:** Based on contractor records in the dataset.
 - **Relevant:** Helps evaluate concentration of projects and identify consistent performers.
 - **Time-Bound:** Data range from 2022 to 2025.

DPWH FLOOD CONTROL PROJECTS

This project contains all necessary information regarding all reported flood control projects by the Department of Public Works and Highways (DPWH). The dataset used for this project is sourced from [sumbongsapangulo.ph](https://data.dpw.gov.ph/sumbongsapangulo). The data visualizations you see here were all done using PowerBI Online.

OBJECTIVES

Objective 4:

To evaluate regional funding equity by measuring how financial resources are distributed across different regions in the Philippines.

KPI Requirement:

- **KPI:** Regional Funding Distribution Ratio
- **Description:** Measures total funding per region divided by the number of projects in that region.
- **SMART Requirement:**
 - **Specific:** Compute $(\text{Total Regional Funding} \div \text{Number of Projects})$ for each region.
 - **Measurable:** Ratio of funding to project count.
 - **Achievable:** Data available per project's location and region.
 - **Relevant:** Determines whether resources are equitably allocated.
 - **Time-Bound:** Measured annually from 2022 to 2025.

OBJECTIVES

Objective 5:

To detect irregularities and inconsistencies in project costs by comparing approved budgets and actual contract expenditures.

KPI Requirement:

- **KPI:** Approved Budget vs. Contract Cost
- **Description:** Compares the total approved budget amount with the total contract cost to highlight any differences in planned versus actual project spending.
- **SMART Requirement:**
 - **Specific:** Analyze and compare total approved budgets with actual contract costs to reveal spending discrepancies.
 - **Measurable:** Display the sum of approved budgets and contract costs through comparative bar charts.
 - **Achievable:** Data sourced from available project financial records.
 - **Relevant:** Detects potential issues such as overspending or underutilization of funds.
 - **Time-Bound:** Evaluated for all projects implemented from 2022 to 2025.
